

A DEEP HISTORY OF PROVIDING EQUIPMENT & SUPPORT TO THE CANNABIS INDUSTRY

www.popecannabisdistillation.com

Pope Scientific Inc. is founded in Menomonee Falls, Wisconsin

1963

Pope Scientific introduces the Wiped-Film Still product line and technology to many industries worldwide.

1975

The 1st Pope WFS sale for a cannabinoid application, (CBD recovery from hemp seed oil byproduct in Canada)

2002

Pope builds Turnkey 400L Reaction System for synthesis of pharmaceutical THC, (first of a series of subsequent skid modules)

2007

Start of the CBD Distillate Boom in the US and elsewhere

THE UNIVERSITY of MISSISSIPPI

The 2nd Pope WFS sale for a cannabinoid application to the University of Mississippi Dept. of Pharmacology, (THC purification from cannabis for research – at the time, the only authorized lab in the US)

2017

Pope begins Cannabinoid Toll Processing and Process Development Services, (for several types of cannabinoids except THC)

2016

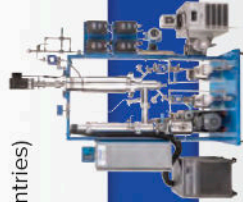

Pope sells over 100 Canna Wiped-Film Stills

Start of the THC Distillate boom in the US

2015

Pope sells over 500 Canna Wiped-Film Stills (in US and several countries)

2019

Pope breaks ground for a 20,000 square foot building expansion (required both for cannabinoid industry and for general industry larger scale distillation and process equipment)

2021

Pope launches the ProPass 600 Canna Still

2023

Pope introduces the fully CE-certified Wiped-Film Still series at MjBizCon

Pope celebrates 60 YEARS in business!
